A branch of DIMA was established in December 2019 in Luxembourg under RCS Luxembourg no. B2404141 and with the merger on January 1, 2020, all assets and liabilities of the Management Company were transferred to DIMA, Luxembourg branch.

Coronavirus

Despite the fact that the corona crisis has stolen most headlines over the past five months, in the second quarter, Danske Bank A/S has focused on sustainability with the launch of a new sustainable positioning of the funds. In this connection, all Danske Invest investment products have been identified in relation to the fund's sustainable investment strategy. Against this background, all the funds have been assigned a positioning with their specific sustainable main focus.

The corona crisis challenged both investors and the investment managers of the SICAV in several ways. Firstly, the very difficult market conditions with extreme market volatility and limited liquidity was in itself a major challenge. Secondly, in addition to the challenging market conditions in March 2020 the lockdown in most countries meant that the operational set-up for the investment managers was changed. With very short notice they had to work from home and establish new ways of communicating. Obviously introducing new ways of working in very stressful market conditions is demanding. However, this has been done with great professionalism and in a way that enabled them to continue managing the funds without any disruptions.

During the month of March 2020, due to high volatility and liquidity constraints on the financial markets, the prices of investments owned by some funds within the SICAV could not be promptly and accurately ascertained on certain days. Therefore, for some days during March 2020 DIMA considered it to be in the best interest of these funds and their shareholders to suspend the net asset value calculation as well as the subscriptions, switches and redemptions orders.

Furthermore, the turmoil affected not only prices in equity funds but also prices in a number of funds with corporate bonds and bonds from high-yield countries. Due to the volatility of the financial markets, DIMA made a temporary adjustment to swing prices as the spread (difference) between the buying and selling prices on the underlying securities widened markedly resulting in higher transaction costs in the funds. Therefore cost factors applied to swing pricing were updated regularly, according to market conditions, and swing pricing was newly introduced to some funds, which previously, were not subject to swing pricing. The redemption flow did not cause any liquidity issues during this period and all redeeming investors were duly reimbursed.

Information to Shareholders (continued)

Relative returns relative to the benchmark have been more mixed across the actively managed funds. A large part of the funds have performed in the second quarter on a par with their benchmark. Danske Invest SICAV - Europe, Danske Invest SICAV - China, Danske Invest SICAV - Global StockPicking and Danske Invest SICAV - Emerging Markets were excellent relative to the markets in which they invest whereas Danske Invest SICAV - Japan, among others, were unable to keep up with their benchmarks. The investment managers worked intensively making use of all available tools to steer the funds through the crisis in the best possible way. (The returns in the main retail share classes of each fund as per June 30, 2020 are available in the following table.)

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with generally accepted accounting principles and laws and regulations in force in the Grand Duchy of Luxembourg applicable to undertakings for collective investment in transferable securities.

a) Valuation of investments in portfolio

In general, we determine the value of each fund's assets as follows:

(i) **Cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued but not yet received.** Valued at full value, adjusted for any appropriate discount or premium we may apply based on our assessments of any circumstances that make the full payment unlikely.

(ii) **Transferable securities and money market instrument that are listed or traded on an official stock exchange or other regulated market.** Generally valued at the most recent price quoted on the market where they are principally traded.

(iii) **Non-listed securities, or listed securities for which the price determined according to the above methods not representative of fair market value.** Valued in good faith at a prudent estimate of their sales price.

(iv) **Derivatives that are traded on stock exchanges or regulated markets.** Valued at the settlement price most recently quoted for a derivative's primary market(s), adjusted if necessary to allow for settlement on a different day if current-day settlement is not possible.

Derivatives that are not traded on stock exchanges or regulated markets. Valued at liquidation value, according to policies applied consistently for each given type of derivative.

(v) **Shares or units of UCITS or UCIs.** Valued at the most recent NAV reported by the UCITS/UCI, or, if the most recent NAV does not reflect current market realities, at fair value.

(vi) **Credit default swaps and contracts for difference.** Valued according to valuation principles set by the Board of Directors of the Management Company, based on mark-to-market practice using standard market practice.

All other swaps. Valued at market value, with reference to the applicable rate curve.

(vii) **Currencies.** Valued at the latest mid-market foreign exchange rate (applies to currencies held as assets, to hedging positions, and when translating values of securities denominated in other currencies into the base currency of the fund).

(viii) **All other assets.** Valued in good faith at a prudent estimate of their sales price.

All valuation methodologies are established by the Board. For any asset, the Board of Directors of the Management Company can choose a different valuation method if it believes that method may result in a fairer valuation. For more information on our asset valuation methods, see the articles.

Changes in value between the time of pricing and the closure of the relevant market will therefore not normally be reflected in the NAV.

d) Cost of investment securities

The acquisition cost of investment securities in each fund expressed in currencies other than the currency of denomination is converted to the base currency at the exchange rates prevailing at the purchase date.

e) Income/charges from investments

Income on long securities and dividends on securities are recognized net of withholding tax quoted at ex-date, to the extent information thereon is reasonably available to the fund. Bank interest, interest on fixed income securities and interest on Contracts For Difference (CFDs) are accrued for each net asset valuation.

f) Forward foreign exchange contracts

Profit and loss arising from un-matured forward foreign exchange contracts are determined on the basis of the applicable forward exchange rates at the valuation date, and are recorded in the combined Statement of Net Assets. Net realised profit / loss and change in net unrealised appreciation / depreciation on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets.

g) Futures contracts

Futures contracts are valued on the last available published price on the valuation date and are recorded in the Statement of Net Assets. Realised profit / loss and change in net unrealised appreciation / depreciation on futures contracts are recorded in the Statement of Operations and Changes in Net Assets.

h) Swing Pricing

On business days when trading in a fund's shares will require net purchases or sales of portfolio investments exceeding a certain percentage of the fund's net assets (as set by the Management Company and approved by the SICAV), a fund's NAV may be adjusted.

This adjustment reflects an assessment of the overall costs incurred in buying and selling investments to satisfy subscriptions or redemptions of shares (understanding that a fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations).

Swing pricing is intended to reduce the impact of these costs on shareholders who are not trading their shares at that time. In general, the NAV will be adjusted upward when there is strong demand to subscribe for fund shares and downward when there is strong demand to redeem fund shares. Swing pricing adjustments are automatic and are applied systematically by computation.

Thresholds and adjustment percentages can vary by fund, but the adjustment will not be larger than 2% of NAV for all share classes within a fund. In extraordinary situations the Management Company can raise this limit to protect the interests of shareholders. No swing pricing adjustment was applied on June 30, 2020.

The NAV for all the funds in the SICAV have swung during the financial period with the exception of the following funds:

Aktiv Förmögenhetsförvaltning, Emerging and Frontier Markets, Europa (SEK), Europe Long-Short Equity Factors, Global High Dividend, Global Portfolio Solution - Balanced, Global Portfolio Solution - Equities, Global Portfolio Solution - Fixed Income, Global Portfolio Solution - Opportunity, Sverige, Global Index and SRI Global.

i) Realised profit / loss on Contracts For Difference ("CFDs")

Net realised profit / loss and change in net unrealised appreciation / depreciation on CFDs are computed on the basis of average cost, and recorded in the Statement of Operations and Changes in Net Assets. The net unrealised profit / loss on CFDs is presented in the Statement of Net Assets.

DANSKE INVEST SICAV

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Swaps Contracts

The total return swaps and inflation swaps are valued at fair market value as determined in good faith pursuant to the procedures established by the Board of Directors of the Management Company. The unrealised profit / loss on swaps is presented in the Statement of Net Assets. The realised profit / loss and change in net unrealised appreciation / depreciation on swaps are presented in the Statement of Operations and Changes in Net Assets.

k) Options Contracts

Options are valued at the market price on the valuation date. Unrealised gains or losses resulting at the time of reporting from the valuation of options are recorded in the Statement of Net Assets. Net realised profit / loss on sale of options is recorded in the Statement of Operations and Changes in Net Assets.

l) Combined financial statements of the SICAV

The combined financial statements represent the sum of the financial statements of each fund after conversion. The consolidated financial statements are presented in EUR, using the exchange rate in effect as at June 30, 2020. The difference between the opening net assets stated at the rate of exchange used for translation into EUR as of June 30, 2020 and December 31, 2019 is shown as currency translation in the Combined Statement of Operations and Changes in Net Assets.

NOTE 4 – PERFORMANCE FEES

Performance fees

The Investment Manager is also entitled to receive a performance fee from the funds Danske Invest SICAV - Eastern Europe Absolute and Danske Invest SICAV - Europe Long-Short Equity Factors, calculated, accrued and locked on each Valuation Day and paid annually in arrears on or after the last Valuation Day in each financial year. If a performance fee is payable in relation to a relevant share class, the performance fee shall be an amount equal to 20% of the Outperformance.

Between two successive calculation dates the Outperformance will be calculated for each relevant share class as the Net Asset Value per Share before additional performance fee accruals minus the higher of:

- The Net Asset Value per Share at the end of the immediately preceding Valuation Day, accrued with the Hurdle Rate (as defined below) and
- The High Water Mark Net Asset Value (as defined below) accrued with the Hurdle Rate (as defined below).

The High Water Mark Net Asset Value per Share is defined as the greater of:

- The Net Asset Value per Share of the relevant share class being the Subscription Price at which Shares of the share class was issued on the launch of the Sub share class; and
- The Net Asset Value per Share of the relevant share class at the end of the immediately preceding Valuation Day, on which a performance fee was charged.

The hurdle rates used to calculate performance fees for the funds Danske Invest SICAV - Eastern Europe Absolute and Danske Invest SICAV - Europe Long-Short Equity Factors are indicated in the table below:

<u>share class Currency</u>	<u>Hurdle Rates</u>
CHF	Swiss Average Rate O/N (SARON)*
EUR	EMMI EURO Overnight Index Average (EONIA)*
NOK	Norwegian Overnight Weighted Average Rate (NOWA)*
SEK	Stockholm Interbank Offered Rate T/N (STIB1D)*
USD	US Federal Funds effective rate (FEDLO1)

Each time the share class outperforms, the outperformance is locked in favour of the Investment Manager. Whenever a positive outperformance level, previously reached, is not achieved thereafter, a High Water Mark Net Asset Value per Share is memorised for the purpose of the performance fee calculation.

Since the performance fees are calculated, accrued and locked on each valuation day and paid annually it is possible that the value of the Shares of Shareholders may reflect performance fees accrued during a part of a year even though they may incur overall losses during such year as a result of the time at which they subscribe or redeem Shares.

The Board of Directors of the SICAV has decided, effective from August 1, 2018 and until further notice, to introduce a zero percentage floor for currencies, where the actual hurdle rate would be negative. This will have a positive impact (less performance fees charged) on currencies where the actual hurdle rate is negative and a zero impact on currencies where the actual hurdle rate is positive.

NOTE 5 – SUBSCRIPTION TAX

Under current law and practice, the SICAV is liable, to an annual subscription tax of 0.05% except those funds or share classes, which may benefit from the lower rate of 0.01% as more fully described in article 174 of the 2010 Laws. No such tax is due on the portion of assets of the fund invested in other Luxembourg UCITS or UCIs (if any) provided that such assets have already been subject to the subscription tax. This tax is payable quarterly and calculated on the basis of the fund's net assets at the end of the relevant quarter.
